

Many minds – one team.

It is the colleagues that make Schlegel und Partner what it is.

Competent. International. Successful.

Today's interviewee: David Felz, economic engineer in the department of mechanical engineering.

Please tell us about your course of study.

I studied industrial engineering and management (M.Sc.) in Karlsruhe, Germany and Grenoble, France.

What was your entry position at SuP – and where are you today?

In 2015, I joined as consultant, shortly after that I was in charge of projects and am now being trained as senior consultant.

Did you have any work experience?

I gained first work experience as order manager at a French department store chain in Luxembourg, in a purely French speaking environment. In addition to that I did several internships.

What does success mean to you?

Professionally, creating team projects in a way that everyone enjoys what they are doing with the result of adding true value for the client.

In my personal life, happiness to me is success.

Which of your strengths are you able to apply working for SuP?

In particular, my enthusiasm for new topics, my fluency in three languages

(German, English, French) as well as cooperating as part of a team.

Which of your colleagues' characteristics do you value the most?

The general enthusiasm for new matters: time and again deep diving into new areas, in the end emerging as an expert oneself.

What errors are the easiest to forgive?

Those that are not kept quiet about.

Do you have any heroes/heroines in history?

Nelson Mandela, Mahatma Gandhi.

Who are your heroes/heroines in real life?

All people that are committed to supporting others.

Which reform do you admire the most?

All those that did or will contribute to equal rights.

Is there any natural gift that you would like to possess?

Yes, to lead Karlsruher SC back into German Bundesliga.

Do you have a motto?

Carpe diem.
